TechMagic

What we do

DevOps Practices Implementation

Custom hands on improvements for your software delivery cycle.

Migration To AWS

Successful cloud migration services for companies of any size in the most diverse industries.

Managed DevOps Services
Managed DevOps team which adopts to project needs.

Infrastructure Audit

Specialised assessments of workloads against best-practices.

TechMagic

DevOps Practice Implementation

- Complete infrastructure bootstrapping.

- Application monitoring, observability, centralized logging.

- Shift left concepts.

- Disaster recovery planning and incident response processes.

TechMagic

The DevOps Journey

What You Get

✓ Flexible engagement: starts from 120h/month and scalable based on your needs

✓ All work is run by Lead DevOps engineer who prepare strategic plans and oversee technical implementation

✓ Best practices implementation tailored to your needs

How It Works

✓ Kickoff with discovery phase and Roadmapping Session

✓ Iterative delivery of solutions

✓ Move to support and maintenance through devops service

TechMagic

Migration to AWS

Choosing the cloud infrastructure is one of the most important steps towards a successful and constantly growing business. You achieve all the benefits of agility and scalability while saving your business lots of costs.

We deliver successful AWS migration services for companies of any size in the most diverse industries.

TechMagic

Migration Step-By-Step

Stage 1

Assess

Analyze the cost and benefits of migrating to the public cloud and determine what to migrate.

Stage 2

Analyze

Determine and analyze the type, configuration, and size of the servers to be migrated.

Stage 3

Plan

Plan the migration schedule and select servers to be migrated.

Stage 4

Migrate

Migrate the servers.

Stage 5

Optimize

Analyze the cost of your cloud infrastructure post migration.

TechMagic

Infrastructure Audit

We run specialised assessments of workloads against best-practices of AWS.

Mainly, we utilize Well-Architected Framework and our AWS Security audit within this offering.

TechMagic

Well-architected review

We help to to evaluate AWS architectures and identify potential issues and risks with environment.

It's based off the AWS Well-Architected Framework, which is a comprehensive set of AWS best practices based of **5 pillars**: operational excellence, security, reliability, performance efficiency, and cost optimization.

Duration:
Varies, typically 2-5 days

Results:
Report with findings and recommendations and guidance to apply improvements.

TechMagic

AWS Security audit

● Comprehensive review of AWS workloads focused on security:

- Identity & Access Management
- Detection
- Infrastructure Protection
- Data Protection
- Incident Response

Duration:
Varies

Results:
Detailed report with all findings, recommendations, and guidance to apply improvements.

TechMagic

Managed DevOps

We help to operate, support and optimize workloads in AWS.

This works as monthly subscription with set of agreed services team of DevOps engineers provide.

TechMagic

Strategy

What You Get

✓ Packages from 10-90 hours per month

✓ Access to team expertise

✓ Biyearly Well-Architected reviews for 60+ hours per month engagement

How It Works

✓ Kickoff with discovery phase and Roadmapping Session

✓ Weekly virtual office hours

✓ Work is directed by Client in collaboration with AWS Delivery manager

TechMagic

Packages

Starter
10 hours/month

✔ great for general AWS account management;
✔ ad-hoc remediation of issues and provisioning;
✔ control cloud costs;
✔ menage identities.

Basic
30 hours/month

✔ great for high level consulting guidance;
✔ ongoing monitoring;
✔ ad-hoc remediation of issues and vulnerabilities;
✔ minor enhancements.

Standard
60 hours/month

✔ great for MVP delivery;
✔ ongoing monitoring and maintenance;
✔ long-term improvements;
✔ best practices implementation.

Pro
90 hours/month

✔ great for supporting large and high-loaded projects;
✔ ongoing monitoring and maintenance;
✔ keep on track with long-term improvements;
✔ effective cloud adoption and Cloud COE enablement.

TechMagic

Popular requests

What can we include in monthly package:
Resources provisioning	IaC templates development & update	Backup management
Ad-hoc Consulting & Engineering Support	AWS Account Management & IAM design	System fault recovery, failover setup
Update and patch management	Proactive monitoring	AWS Cost Optimization
Cleanup, maintenance	Incident response and resolution	Training and workshops

TechMagic

Typical Flow

Step 1

Initial Meeting

Intro
Business problem presentation

Attendees: DM, SM, client
Duration: 30-60 minutes

Step 2

Technical Meeting

Review initial scope and
existing processess
Requirement scoping
Discovery phase approval

Attendees: DM, SM, client
Duration: varies

Step 3

Discovery Phase

Technical scope review,
capacity planning
Creation of communication
plan, RACI matrix, roadmap
Creation of proposal

Duration: 7-14 days

Step 4

Proposal Approval

Contract signing
Deposit sent
Required access granted

Attendees: DM, SM, CFO,
client team
Duration: varies

Step 5

Start Of Cooperation

Team intro
Begin iterative work based
on roadmap

Magic Projects

psHEALTH

ACORN-i

universum

TechMagic

psHEALTH

It is not the first time we cooperate with psHealth. In 2020, we worked with this company on automated referral and triage software for healthcare services. The software was mainly working within the NHS, but also for private healthcare services.

Recently, they've acquired another company called Florence, a patient engagement and management platform. After this acquisition, the psHealth team decided to migrate 100% of Florence workloads to AWS infrastructure. For this work, psHealth engaged with TechMagic again. Being an official AWS partner, our certified AWS team delivered the entire migration within five months.

More about the project

TechMagic
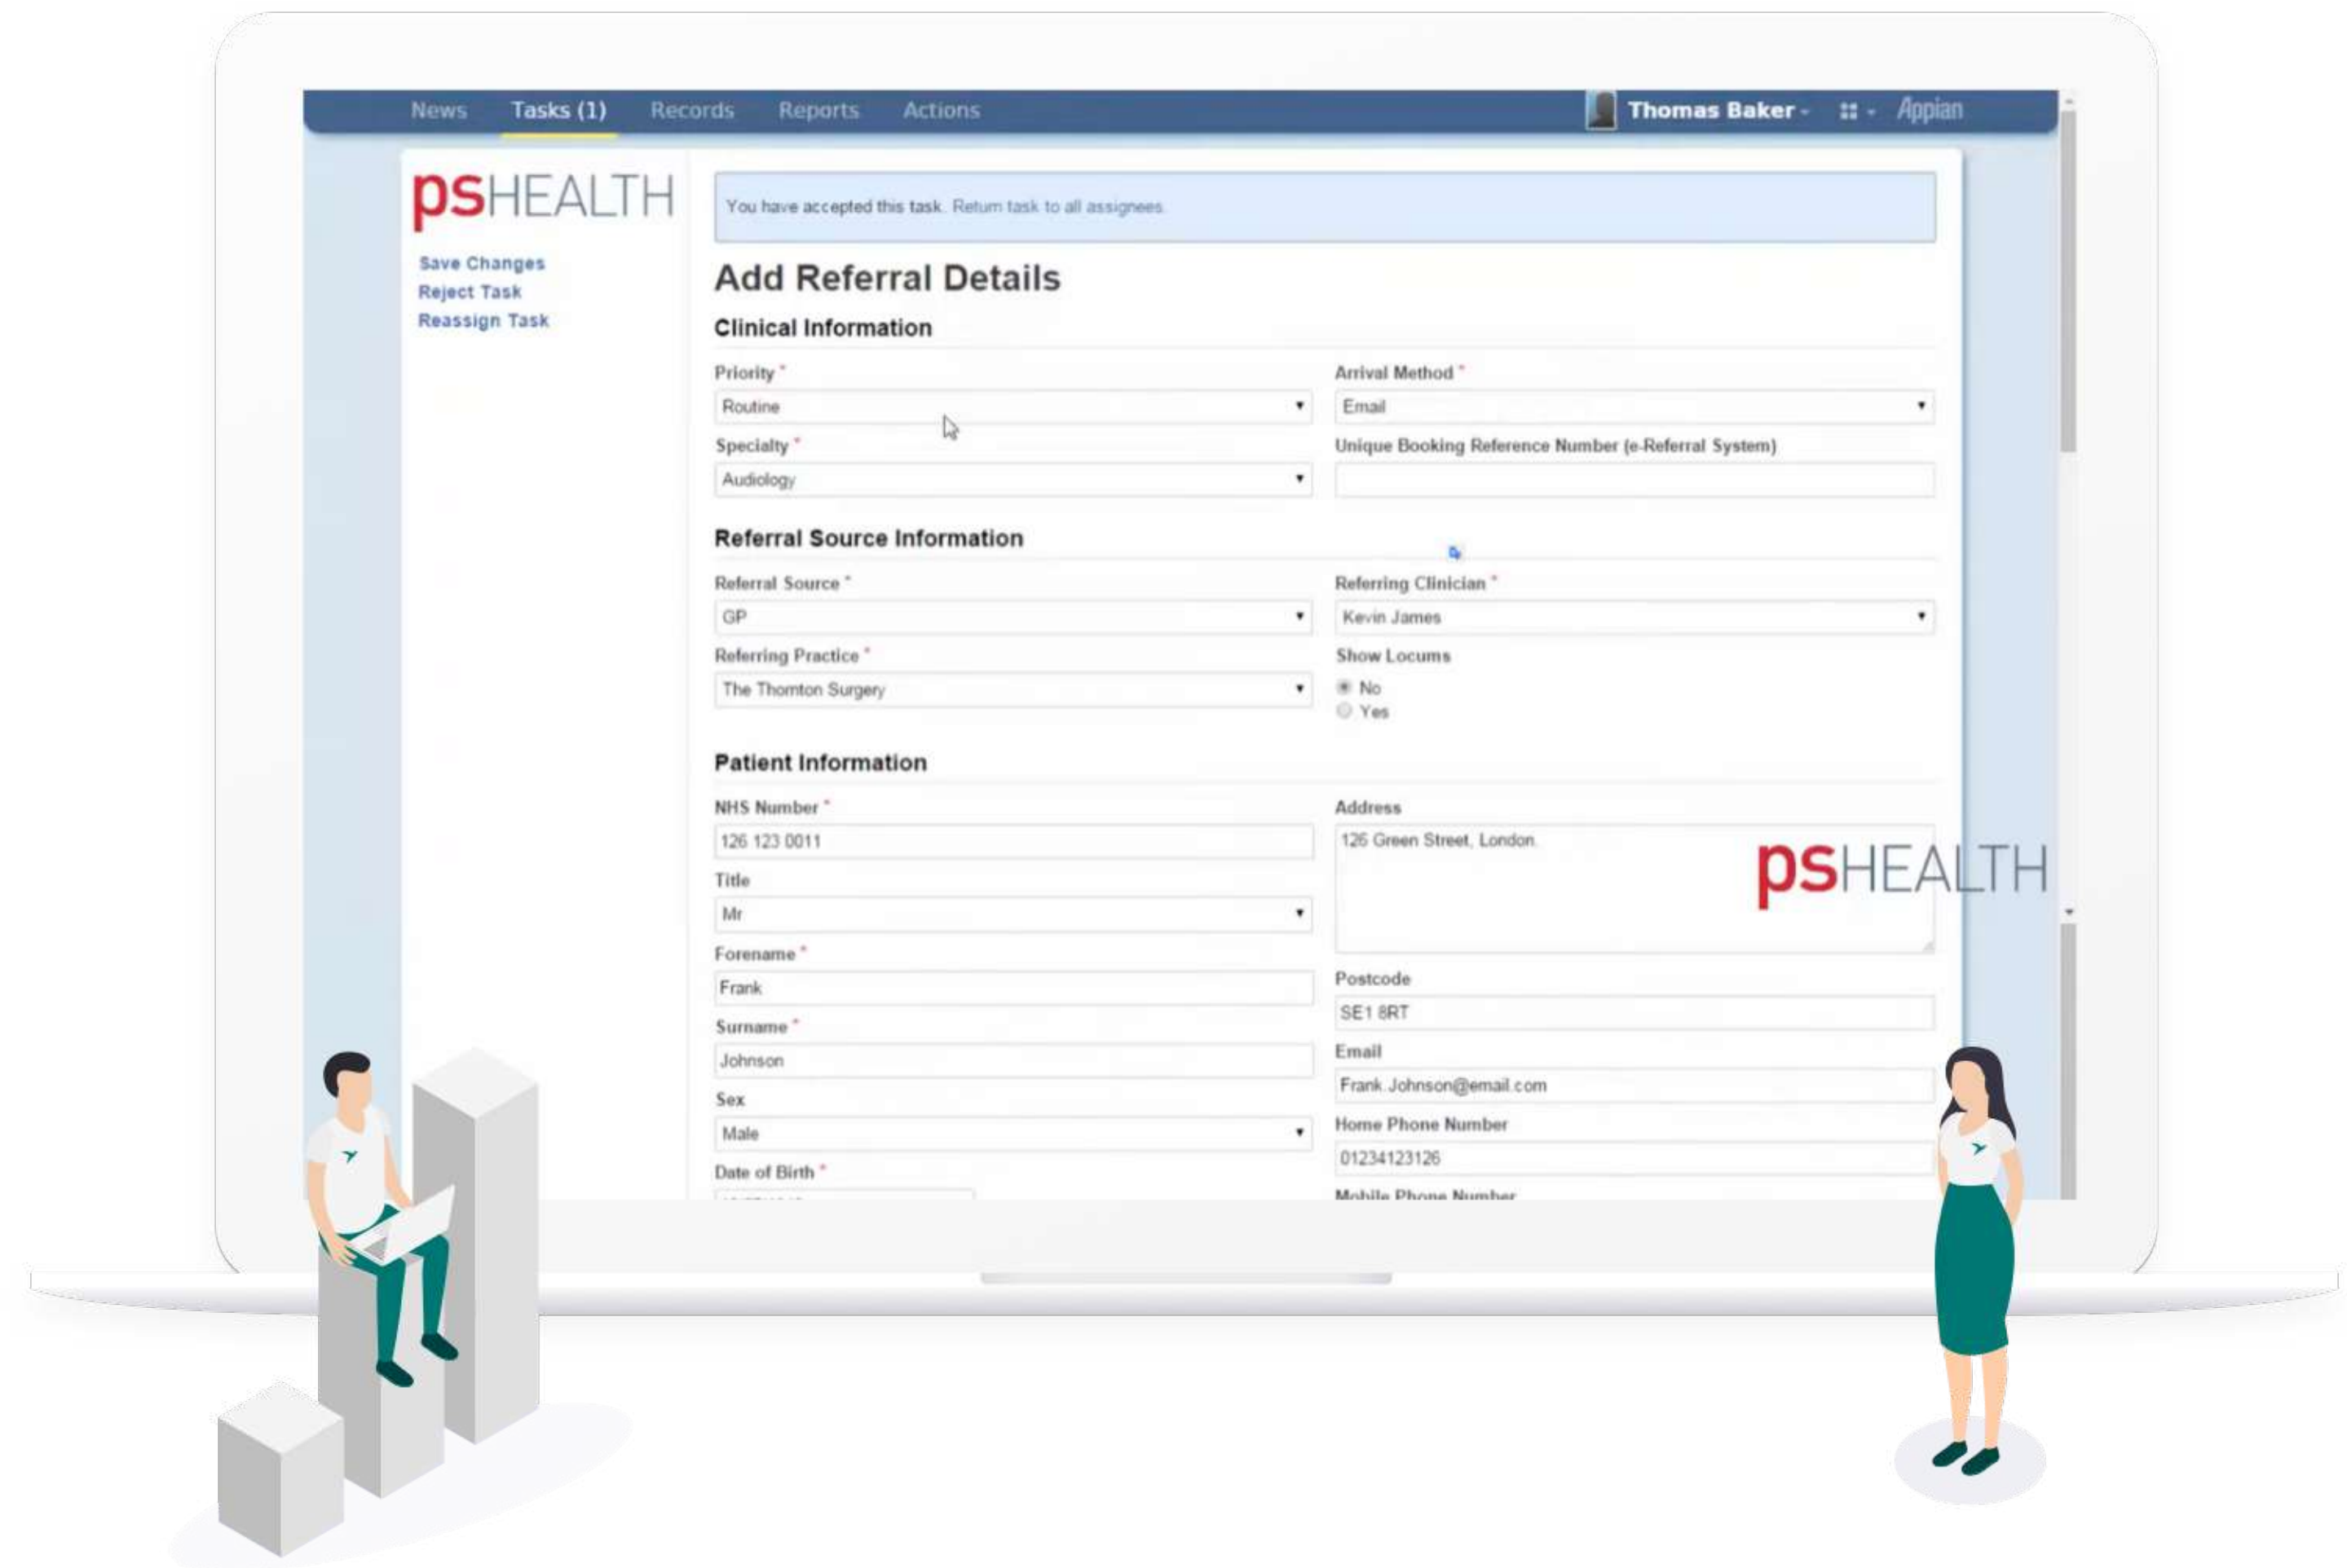

ACORN·i

Acorn-I is an intelligent platform that helps brands and sellers to boost their online presence and increase the return from e-commerce investments. The platform gives users access to Amazon search analytics, real-time performance tracking, well-structured data, advertising and promotions.

By using Angular and Highcharts library, we built a web application with modern, interactive and user-friendly UI/UX design. Also, we build a Serverless API for the web app and delivered refactored data pipeline automation through AWS Cloud Development Kit. As a result, the data platform became testable, more reliable and simple-to-use. It helped us to increase the performance of the existing solution in 15 times.

More about the project

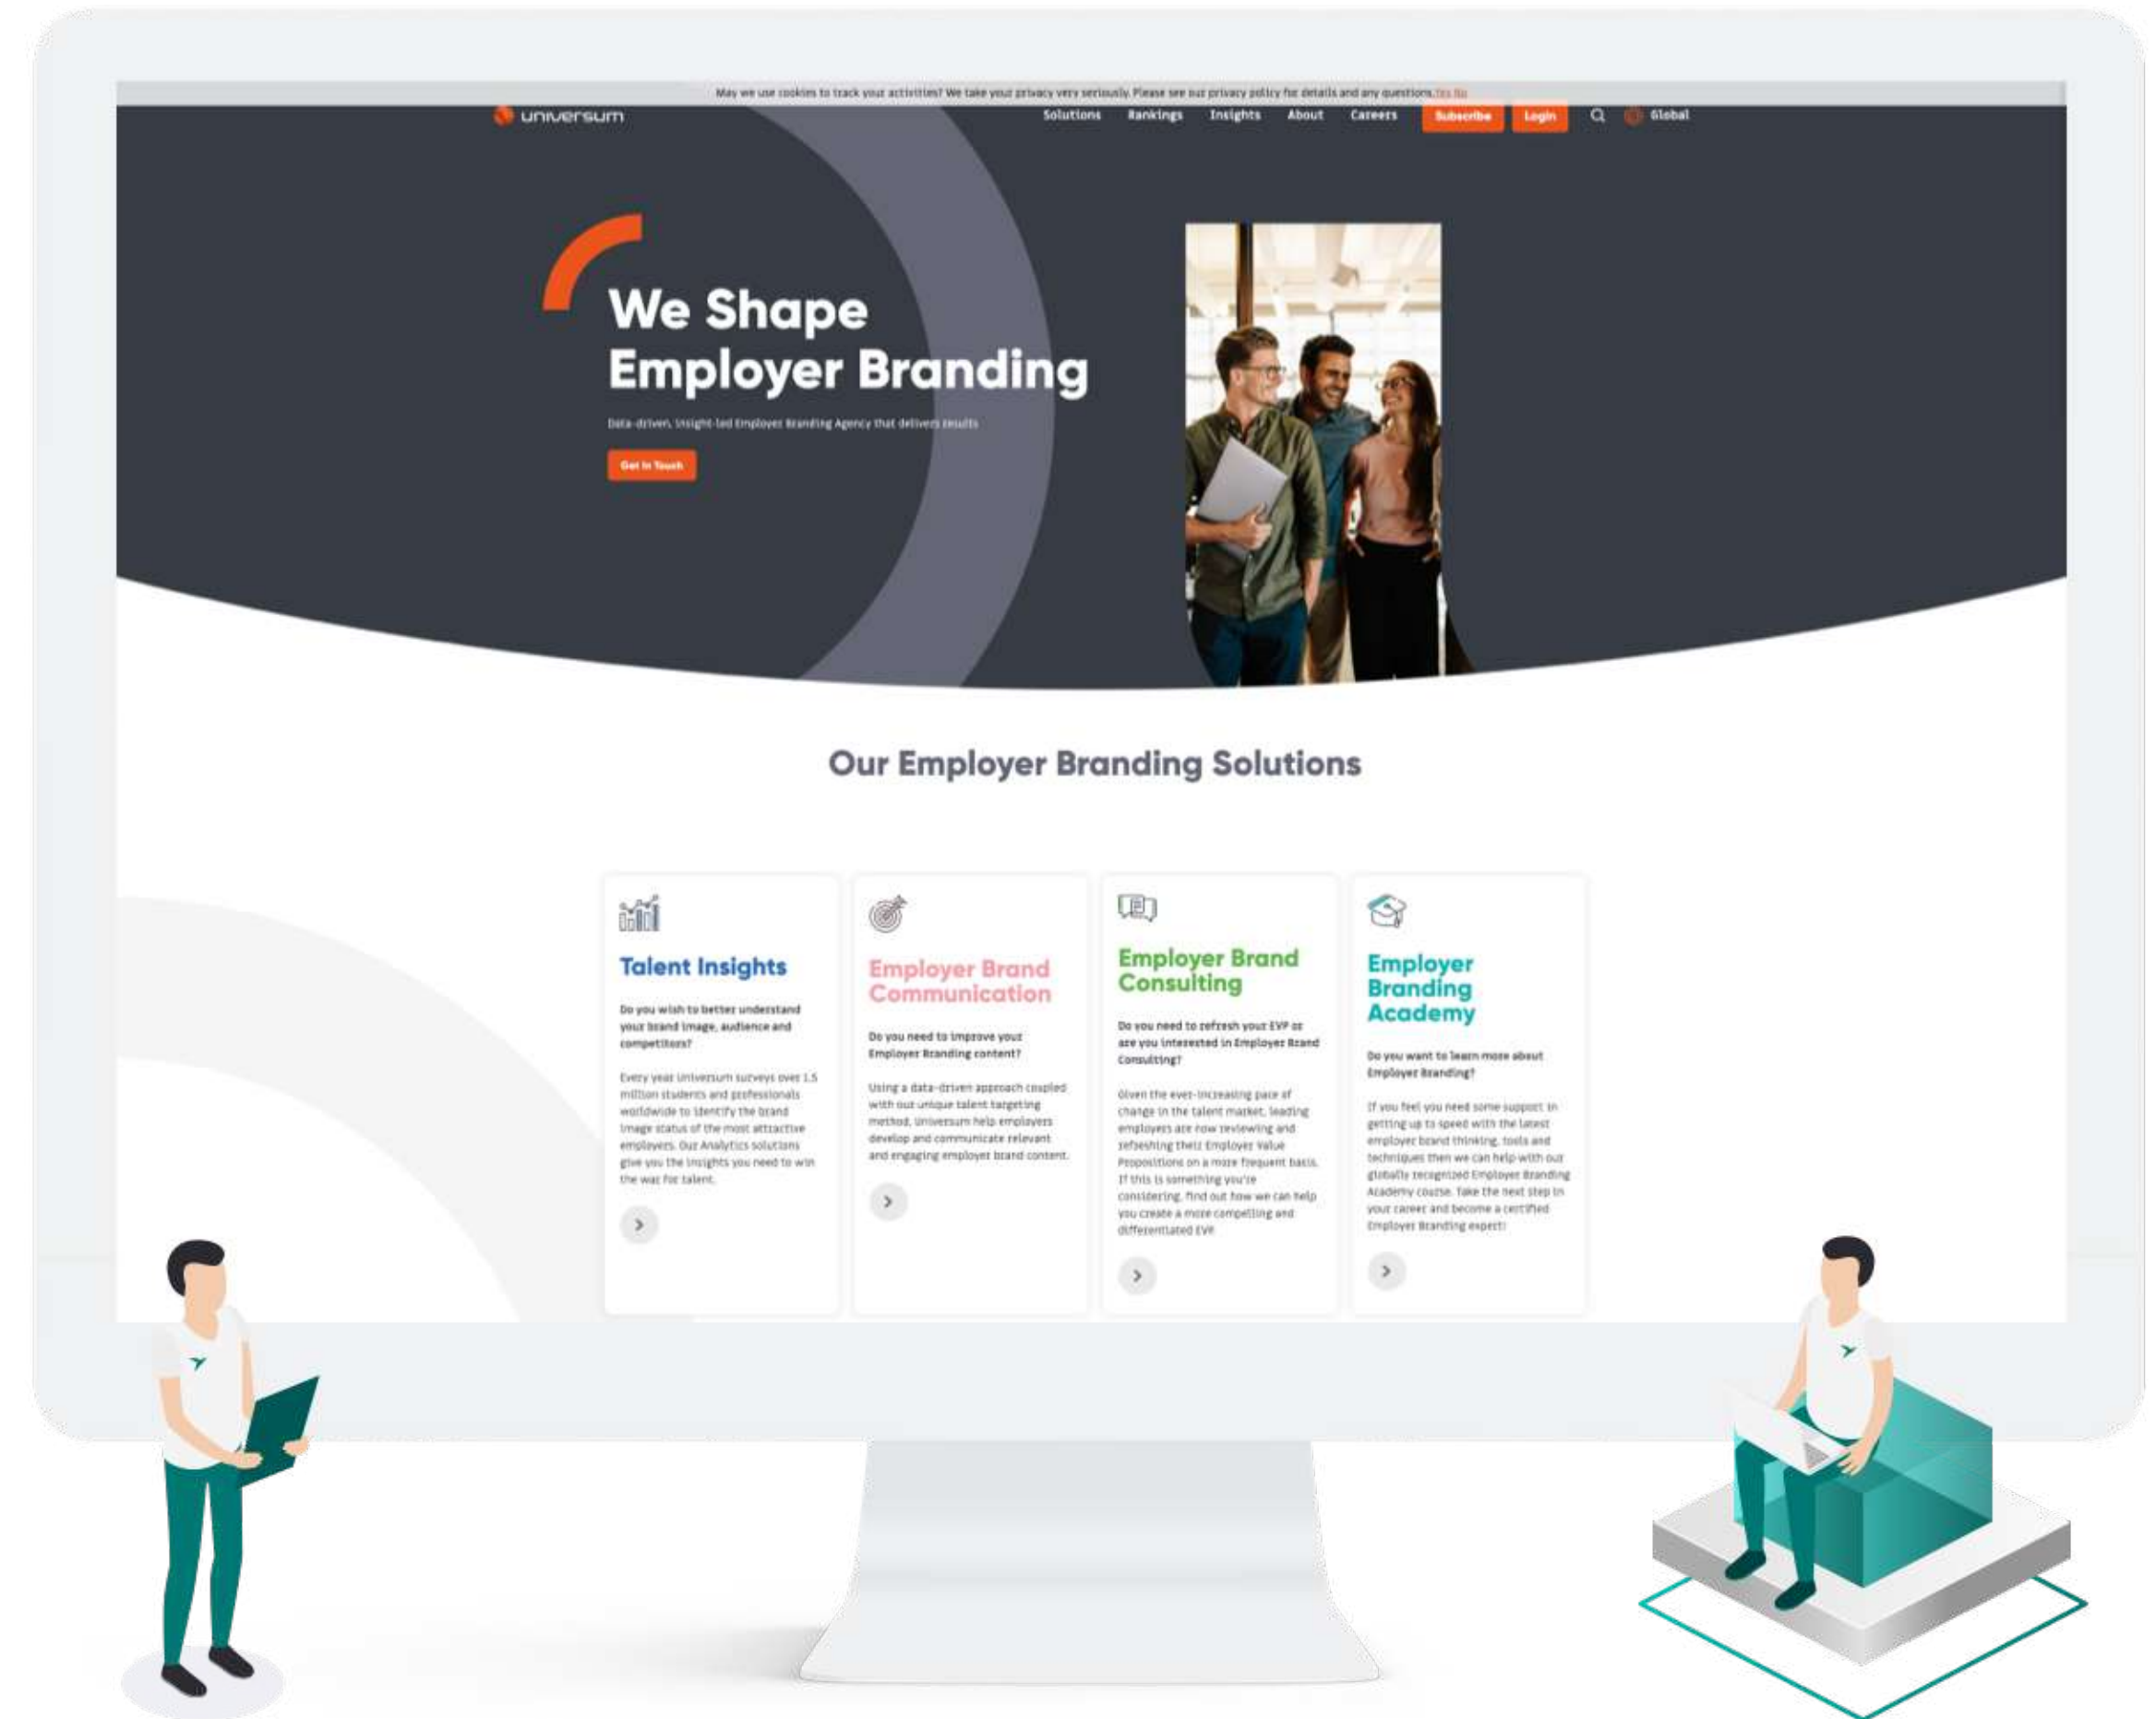

TechMagic
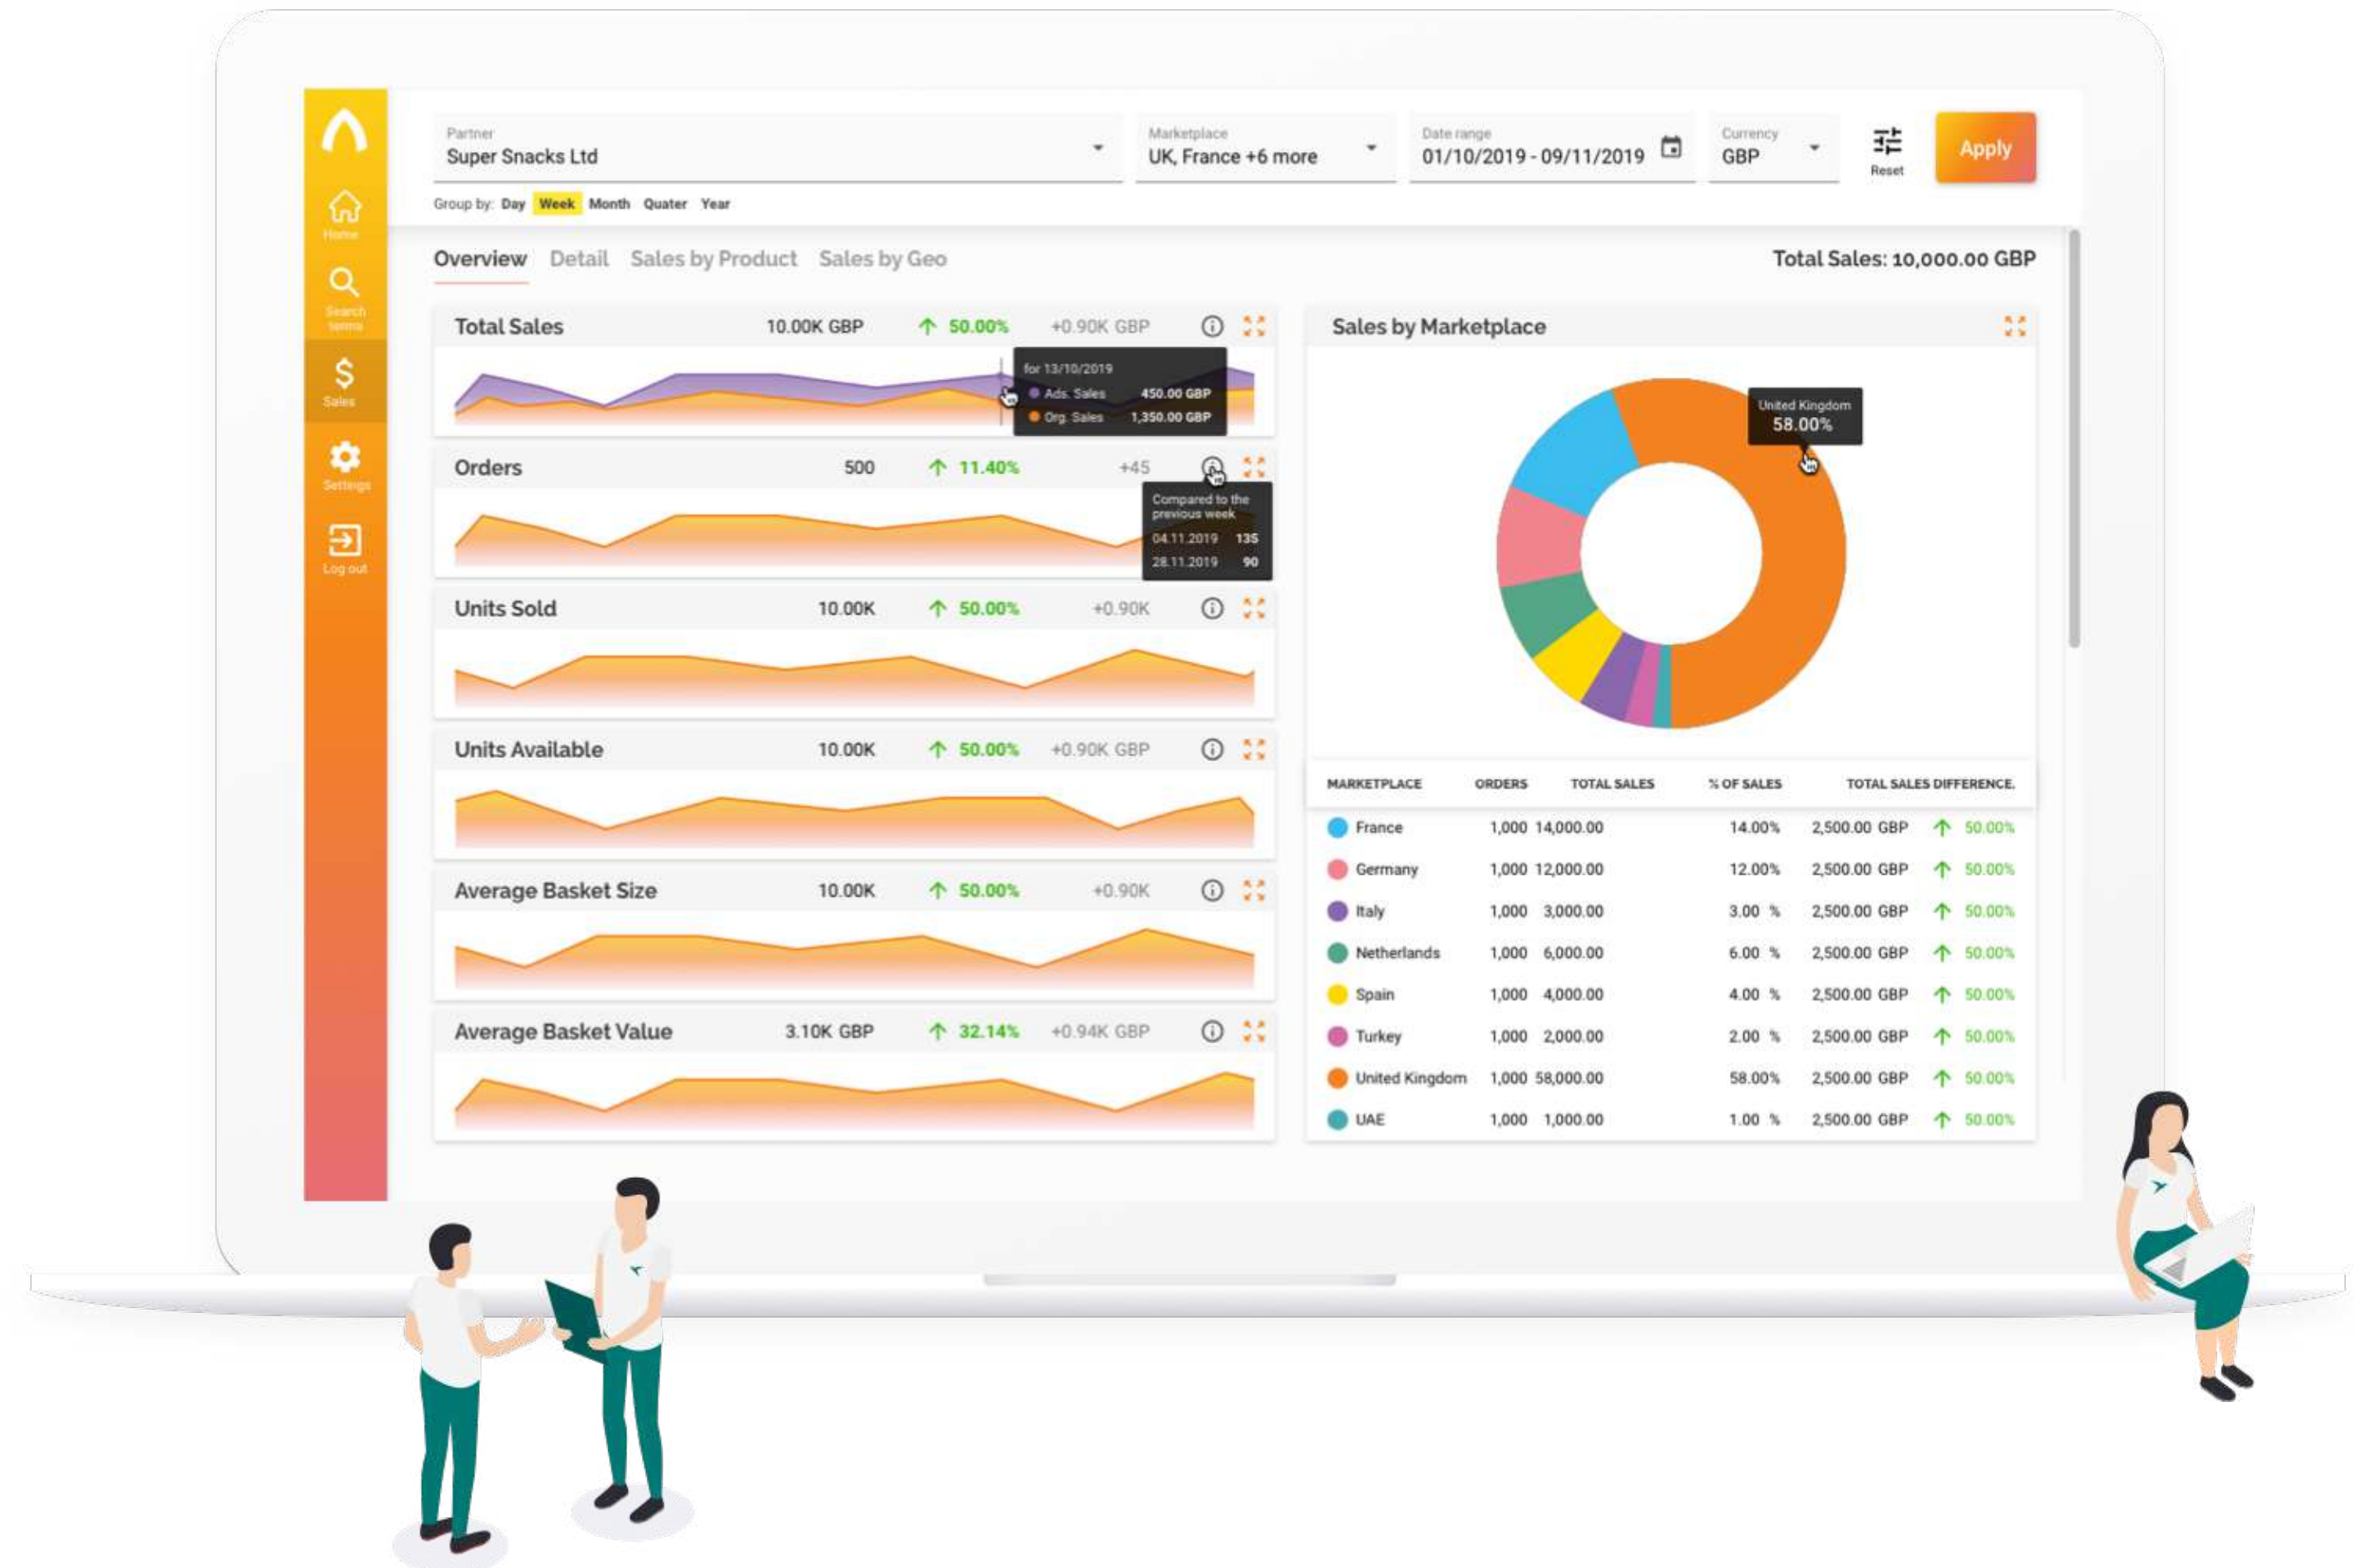

universum

UNIVERSUM is The Global Employer Branding Leader in HR software development solutions that help employers understand, attract, and retain current and future ideal employees.

What we've done:

- Migrated HR app development from Heroku to AWS, so the application can rely on more stable and scalable architecture with higher security.

- Integrated CI/CD Atlassian Bamboo that makes building and deploying an application much faster and convenient for engineers.

- Dockerized an application so that it can work efficiently in different environments.

- Created AWS Production VPC and AWS Dev environment with internal visibility full error-monitoring system.

TechMagic

Our Customers on AWS

Sam Madeley · CTO at psHealth

TechMagic migration has received a lot of positive feedback, and now, the client's application works better than ever. The team was very clear, and they excelled at communicating and doing their job well. Additionally, they paid close attention to detail and offered accurate time estimates.

Adrian King · CTO at Elements.cloud

I have worked with TechMagic for almost 4 years and during that period they have become our core strategic partner of Elements.cloud providing development and DevOps skills and architecting our solution on the AWS platform. They have helped drive increasing use not just of the core delivery capabilities (VPC, EC2, Lambda, Cloudfront, WAF) but also the use of CloudFormation, CodePipeline, Deploy and Build with capabilities such as AWS Inspector.

Valerie Fraysse · CTO at Good.co

We've been happily working with Techmagic for more than 4 years. Techmagic is a very professional consulting company, with a solid expertise in mobile and web development, as well as cloud infrastructure. They are easy to work with, dependable, creative, and communication is very fluid. They have a pool of experts and can help solve a wide range of problems.
