Automation**

# Our Technology Stack

## Backend

.NET

## Frontend

NEXT.js

## Infrastructure

# Our Working Models

## Dedicated Team

We provide dedicated teams and take care of all practical issues, from recruiting your developers to covering all the needs such as office facilities, devices, training, etc. This model usually works on a T&M basis when clients are invoiced only for the particular number of hours spent on their projects.

## Fixed Price

The fixed price model of cooperation is designed for short-term cases like feasibility studies, R&D tasks, proof of concept, and others. They all need accurate time and budget estimates with minimum uncertainties and maximum understanding of requirements.

# Our Clients

# Elements

**Elements.cloud** is a B2B SaaS platform that helps to visualize and organize business processes of a certain company. It has an interactive centralized space for process mapping in a cloud that allows bringing a new level of operational excellence.
